IV. I, the undersigned official veterinarian, certify that:

1. The semen described above was collected, processed and stored under conditions which comply with the standards laid down in Directive 88/407/EEC.
2. The semen described above was sent to the place of loading in a sealed container under conditions which comply with Directive 88/407/EEC.
3. The semen described above was collected in a centre where all bulls gave a negative result to a serum neutralisation test or an ELISA test for infectious bovine rhinotracheitis or infectious pustular vulvo-vaginitis carried out in accordance Directive 88/407/EEC<sup>(1)</sup>;
4. The semen described above was collected from bulls:
  - (i) which gave negative result to a serum neutralisation test or an ELISA test for infectious rhinotracheitis or infectious vulvo-vaginitis carried out in accordance with Directive 88/407/EEC<sup>(1)</sup>; or
  - (ii) which gave a positive result to the tests referred to at (i) but which had already given a negative reaction to these tests prior to a first vaccination in accordance with the Directive 88/407/EEC at the semen collection centre <sup>(1)</sup>; or
  - (iii) which gave a positive result to a serum neutralization test or an ELISA test for infectious bovine rhinotracheitis or infectious pustular vulvo-vaginitis and have not been vaccinated in accordance with Directive 88/407/EEC<sup>(1)</sup>: and in which case the semen comes from a collection which has been subjected, with a negative result, to an examination by inoculation or a virus isolation test <sup>(1)</sup> as referred to in the third subparagraph or Article 4 (1) of Directive 88/407/EEC in \_\_\_\_\_ laboratory <sup>(2)</sup>;
5. The semen described above was collected from bulls:
  - (i) which have not been vaccinated against foot-and-mouth disease within 12 months prior to collection <sup>(1)</sup>; or
  - (ii) which have been vaccinated against foot-and-mouth disease within 12 months prior to collection, in which case the semen comes from a collection in which 5% of each collection intended for trade (with a minimum of 5 straws) has been subjected, with negative results, to a virus isolation test for foot-and-mouth disease in \_\_\_\_\_ laboratory <sup>(2)</sup>.
6. The semen described above has been stored in approved conditions for a minimum period of 30 days prior to dispatch.
7. The semen described above has been collected in a centre where no case of B.S.E. has been diagnosed.
